## Summary

---

Product-driven full-stack developer focused on building scalable, **user-centric applications**. Experienced in shipping end-to-end products, optimizing backend performance, and designing intuitive user experiences. Strong foundation in frontend and backend development, with growing expertise in infrastructure, **performance optimization**, and **AI-driven features**. Contributes to open source and works at the intersection of product, engineering, and AI/ML.

## Experience

---

### General Secretary

March 2026 – Present

*Developers Club, Newton School of Technology*

- Led **club operations and strategic planning**, ensuring smooth execution and long-term growth.
- Organized **technical initiatives** and mentored developers across multiple domains.
- Managed **projects and internal tools**, improving productivity and operational efficiency.
- Coordinated across **Open Source, Full-Stack, and Mobile verticals**, ensuring strong collaboration.

### Full Stack Developer

Aug – Oct 2025

*Kixar Private Limited*

- Developed a **Coupon Management System** integrated with turf booking, supporting multiple coupon types.
- Designed **Partial Payment + Coupon workflow**, enabling seamless discount application within a single transaction.
- Built **modular and scalable architecture** using reusable components and separation of concerns.
- Documented **REST APIs using Swagger (OpenAPI)**, improving collaboration, clarity, and validation handling.

## Projects

---

**DCODE** | *React, Tailwind CSS, Framer Motion, Zustand, Node.js, Express, MongoDB*

(Live) (GitHub)

- Scaled platform to **800+ developers** with contributions to high-impact repositories.
- Built a **continuous open-source platform** enabling developers to contribute beyond programs like GSoC.
- Reduced backend database operations by **80–85%** using optimized contribution tracking logic.
- Implemented **PR tracking, streaks, achievements, onboarding flows, and repository discovery**.

**LoveLeetCode** | *Next.js, Tailwind CSS, Prisma, PostgreSQL, Node.js, Express*

(Live) (GitHub)

- Achieved **200+ user growth** with strong retention and daily engagement.
- Integrated secure code execution using **Judge0** and designed scalable database schemas.
- Built a **DSA learning platform** with structured paths and developer-friendly UI.
- Developed **playlists, dashboards, admin controls, and personalized learning flows**.

## Skills

---

**Languages:** SQL, Python, JavaScript, TypeScript, HTML, CSS

**Frameworks:** React, Next.js, Express.js, Redux, Tailwind CSS, Prisma

**Databases:** PostgreSQL, MongoDB, MySQL

**AI/Data:** NumPy, Pandas, Generative AI, OpenAI API

**Tools:** Docker, AWS, GCP, Firebase, Supabase, Linux, Nginx

**Other:** OAuth 2.0, Git, GitHub Actions, Swagger, Postman, Jest, Zustand

## Achievements

---

- Open-source contributor with multiple merged PRs across repositories.
- Freelance developer delivering real-world client projects with 1.5+ years of experience.
- Active contributor in technical communities and college ecosystem.

## Education

---

**B.Tech in Artificial Intelligence**

2024 – 2028

*Newton School of Technology, Rishihood university*

*CGPA: 7.13/10*
